

Amendments to the specification:

Please replace the paragraph at page 7, lines 1-5 with the following amended paragraph:

The fork frame (9) is supported with its pivot axis (6), which extends in the upper frame end, on a fork framework (13); this fork framework (13) is fixed with its upper end on the rotating ring (10) and the rotating ring (10) is held movable on the drive frame ~~(14)~~(12) by means of a moving device ~~(14)~~(14a) for storing and retrieving reels. The actuator (8), which also acts onto the fork frame (9) at the lifting element (8a), is fixed on the fork framework (13) in the height region of the fork (1).
